

TRADEX ALGO

Complete User Guide — XAUUSD Scalping Indicator

Platform: TradingView | Asset: XAUUSD (Gold) | Primary Timeframe: 5 Minutes

PART 1 — PAANO GUMAGANA ANG TRADEX ALGO

1. Supertrend (Core Engine)

Ang Supertrend ang puso ng indicator. Ito ay nagco-compute ng ATR (Average True Range) para malaman kung saan ang trend.

State	Kondisyon	Candle Color
Bullish (Up)	Presyo nasa ITAAS ng line	Green
Bearish (Down)	Presyo nasa IBABA ng line	Red

2. Cloud Ribbon (EMA 9 / EMA 21)

Ang purple/fuchsia ribbon ay ginawa mula sa dalawang EMA. Ito ang nagpapakita ng trend strength.

Cloud Behavior	Ibig Sabihin
Makapal, malakas kulay	Malakas ang trend — ok pumasok
Manipis, nagkukrus	Nagbabago ng direksyon — mag-ingat
Flat at patag	Choppy/ranging — huwag pumasok

3. Background Color

Nagbibigay ng subtle na kulay sa buong chart para madaling makita ang overall trend.

Background	Supertrend	Ibig Sabihin
Teal tint	Bullish	BUY bias — trend pataas
Purple tint	Bearish	SELL bias — trend pababa

4. BUY / SELL Signals

Lalabas ang signal kapag **nagbago ang Supertrend direction** (flip). Isa sa pinaka-importanteng parte ng indicator.

Signal	Kailan Lalabas	Arrow
BUY	Supertrend flip: Bearish → Bullish	Green arrow below candle
SELL	Supertrend flip: Bullish → Bearish	Red arrow above candle

IMPORTANTENG TANDAAN: Pumasok LAMANG sa signal candle. Kapag lumipas na ang signal at malayo na ang presyo, SKIP na at hintayin ang susunod na signal.

5. Entry / Stop Loss / Take Profit Levels

Kapag lumabas ang signal, awtomatikong kino-compute at ini-draw ng indicator ang mga levels:

Level	Kulay	Formula	Gamit
Entry	Orange dashed	Close ng signal candle	Pumasok dito
Stop Loss	Red solid	Supertrend line	Cut loss dito
TP1	Teal dotted	Entry $\pm$ 1.5x Risk	Partial profit
TP2	Teal dotted	Entry $\pm$ 2.5x Risk	Main target
TP3	Teal dotted	Entry $\pm$ 3.5x Risk	Max target

BABALA: Kapag na-hit na ang TP2, HUWAG nang pumasok kahit Sell/Buy signal pa ang nakikita. Ang risk-reward ay hindi na maganda. Hintayin ang bagong signal.

6. Dashboard (Top Right)

Ipinapakita ng dashboard ang Supertrend direction ng **6 iba't ibang timeframes** para malaman ang overall market bias.

Row	Ibig Sabihin
1	1-minute Supertrend direction
5	5-minute Supertrend (primary timeframe)
15	15-minute Supertrend
30	30-minute Supertrend
1H	1-hour Supertrend
1D	Daily Supertrend (big picture)
AVG	Bullish kung 4 o higit pa ang Up, Bearish kung 4+ ang Dn
Vol	Hi = volume above average / Lo = volume below average

PART 2 — RULES PARA SA ENTRY

Complete BUY Checklist

#	Kondisyon	Bakit Kailangan
1	BUY signal lumabas	Supertrend flip to bullish
2	Dashboard AVG = Up	Majority ng TFs pabor sa BUY
3	Vol = Hi	May sapat na volume para sa move
4	Hindi pa na-hit ang TP2	Magandang R:R pa rin
5	Background = Teal	Overall trend bullish

Complete SELL Checklist

#	Kondisyon	Bakit Kailangan
1	SELL signal lumabas	Supertrend flip to bearish
2	Dashboard AVG = Dn	Majority ng TFs pabor sa SELL

3	Vol = Hi	May sapat na volume para sa move
4	Hindi pa na-hit ang TP2	Magandang R:R pa rin
5	Background = Purple	Overall trend bearish

GOLDEN RULE: Kapag hindi pumasa ang LAHAT ng 5 kondisyon, HUWAG pumasok. Hintayin ang setup na kumpleto ang lahat.

PART 3 — PAANO BASAHIN ANG DASHBOARD

Scenario Examples

Dashboard Reading	Interpretation	Aksyon
5/6 Up + Vol Hi + BUY signal	Strong BUY setup	PUMASOK — BUY
5/6 Dn + Vol Hi + SELL signal	Strong SELL setup	PUMASOK — SELL
Mixed (3 Up, 3 Dn) + any signal	Walang malinaw na bias	SKIP — hintayin
Majority Dn + Vol Lo + SELL signal	Weak signal	WAIT — hintayin Vol Hi
AVG Up pero 1m/5m Dn	Counter-trend bounce	SKIP — hindi pwede

PART 4 — FREQUENCY NG SIGNALS AT BEST TRADING HOURS

Signal Frequency (5m Chart)

Market Condition	Signals per Day	Quality
Trending market	3–8 signals	Maganda — sundin ang trend
Ranging/choppy	10+ signals	Maraming false — mag-ingat
Low volatility	1–3 signals	Mababa — hintayin ang session

Best Trading Hours (Manila Time / PHT)

Session	Oras (PHT)	Signal Quality
Asian Session	5:00 AM – 1:00 PM	Mahinang signals — mababang volatility
London Open	3:00 PM – 5:00 PM	Magandang signals — lumalabas ang trend
London-NY Overlap	9:00 PM – 1:00 AM	BEST — pinaka-malakas na signals
NY Open	9:30 PM – 11:30 PM	Malakas — mataas na volatility
Late NY / After hrs	1:00 AM – 5:00 AM	Bumababa — maagang mag-stop

TIP: Ang pinaka-magandang oras para gamitin ang Tradex Algo ay 9:00 PM – 1:00 AM (PHT). Ito ang London-NY overlap — dito pinaka-malakas ang moves ng XAUUSD.

PART 5 — TRADE MANAGEMENT

Entry at Exit Rules

Sitwasyon	Dapat Gawin
Signal lalabas (BUY/SELL arrow)	I-check ang checklist → pumasok kapag kumpleto
TP1 na-hit	Pwedeng mag-partial close (50% ng position)
TP2 na-hit	Main profit — pwedeng fully close na
TP3 na-hit	Maximum profit — full close
SL na-hit	Accept ang loss — huwag mag-average down
Lumipas na ang signal	SKIP — hintayin ang susunod na signal
TP2 na-hit, bagong signal pa	SKIP — hintayin ang fresh setup

Kailan Hindi Pwedeng Pumasok

Kondisyon	Dahilan
Vol = Lo	Walang volume = pwedeng fake move
Dashboard mixed (3 Up, 3 Dn)	Walang malinaw na bias
TP2 na na-hit ng signal	R:R hindi na maganda
Asian session (5AM-1PM PHT)	Mababang volatility, maraming false signals
Counter-trend signal	Ex: BUY signal pero AVG = Dn — laban sa trend

PART 6 — PAANO MAG-SET NG ALERTS

May 4 alert conditions ang Tradex Algo na pwede mong i-set sa TradingView:

Alert Name	Kailan Mag-fi-fire	Inirekomenda
BUY Signal	Bawat Supertrend flip pataas	Pangalawa
SELL Signal	Bawat Supertrend flip pababa	Pangalawa
BUY Confirmed (MTF)	BUY flip + 4+ timeframes bullish	PANGUNAHIN
SELL Confirmed (MTF)	SELL flip + 4+ timeframes bearish	PANGUNAHIN

Step-by-Step Alert Setup sa TradingView

1	I-click ang 'Alerts' button (bell icon) sa TradingView toolbar
2	I-click ang 'Create Alert'
3	Sa 'Condition', i-select ang 'Tradex Algo' indicator
4	Piliin ang 'SELL Confirmed (MTF)' o 'BUY Confirmed (MTF)'
5	Sa 'Trigger', piliin ang 'Once Per Bar Close'
6	I-set ang notification — Email, App notification, o SMS
7	I-click ang 'Create' para i-save ang alert

TIP: I-set ang 'SELL Confirmed (MTF)' at 'BUY Confirmed (MTF)' para mas mababa ang false alerts. Hindi ka na kailangang laging nakamasid sa screen.

QUICK REFERENCE — Cheat Sheet

	BUY Setup	SELL Setup
Signal	BUY arrow (green)	SELL arrow (red)
Background	Teal tint	Purple tint
Dashboard	AVG = Up	AVG = Dn
Volume	Vol = Hi	Vol = Hi
Entry	Close ng signal candle	Close ng signal candle
Stop Loss	Supertrend line (below)	Supertrend line (above)
TP1	Entry + 1.5x Risk	Entry - 1.5x Risk
TP2	Entry + 2.5x Risk	Entry - 2.5x Risk
TP3	Entry + 3.5x Risk	Entry - 3.5x Risk
Best Time	London-NY (9PM-1AM PHT)	London-NY (9PM-1AM PHT)
SKIP kapag	TP2 na na-hit / Vol Lo	TP2 na na-hit / Vol Lo
